GENERATION NEW

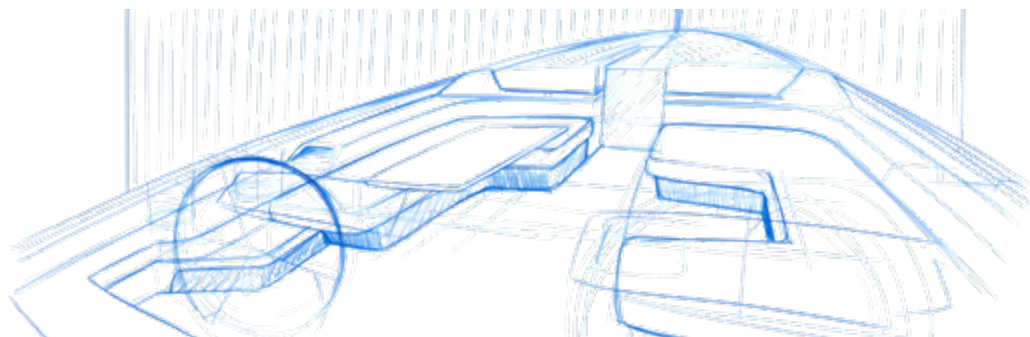

THE DESIGN VISION

The cooperation with Berret-Racoupeau has produced a concept that reaches completely new dimensions. While we are breaking new ground, we remain true to the Hanse DNA and continue to focus on Fast Cruising, Easy Sailing and Individual Customisation - now in an innovative and new look. The new hull design clearly stands out from the previous models with a sporty, aggressive look and clear lines. The new design impresses with striking details: an angular, flat and elongated cabin superstructure, voluminous hull with high freeboard, a negative bow stem as well as hard-set chine edges, give the ship a unique appearance and ensure enormous living space and unparalleled performance on the water.

HANSE SUCCESSES

 VISIT THE NEW
HANSE RANGE **HERE**

The Hanse 460 has marked the beginning of a new era in sailing boat design, with her outstanding design being internationally recognized and awarded. Just a year after its spectacular success, her big sister ship followed suit with the Hanse 510. As typical for Hanse, the Hanse 510 impresses with her easy handling and innovative technical solutions. Continuing the success story of this new design generation, the new Hanse 410 follows in the footsteps of her larger sisters. Now, the brand-new Hanse 360 continues this revolutionary design trend.

SPACE

WONDER

The typical Hanse chines that run through the hull shape not only give the Hanse 360 a striking look, but also contribute to its stability and performance. The optional bowsprit extends the sailing options and gives the yacht additional performance on the water. The well-thought-out positioning of all lines to the helm allows you to steer the yacht safely and comfortably, even single-handed.

POWERED BY SUSTAINABILITY

Lead the charge towards a sustainable future with our carbon-neutral full electric propulsion. A remarkable 55 NM range sets a new standard in eco-conscious sailing. Crafted from PET, our sustainable performance sails not only deliver unparalleled performance but also make a bold statement in environmental responsibility. Embrace green energy with an integrated fuel cell, ensuring every wave you conquer is a step towards a cleaner world. Green energy takes center stage with the integration of a fuel cell, making every journey a step towards a greener future.

Integrated solar panels

Full electric propulsion

Fuel cell with up to 125 W.

TAILORED COMFORT

With the optional wet bar with BBQ in the cockpit, socialising in the open air becomes a real pleasure. Barbecue culinary delights and enjoy them together with family and friends at the spacious cockpit tables. Enjoy refreshing drinks and let your mind wander over the wide sea or the clear sky. Thanks to the additional cooling facilities, your drinks will always be at the perfect temperature.

INNOVATION MEETS COMFORT

The new Hanse is a real space wonder at 36 feet. The interior offers a luxurious retreat on the water that meets the highest standards of comfort and style. Choose from unique layout variants that suit your preferences. The layout is exceptionally practical, and numerous customization options allow you to curate your ideal Hanse experience. An additional large cabin with a double bed or a second wet room in the foredeck is available as an option. Revel in outdoor entertaining with the distinctive wet bar in the cockpit. Multiple fridge options, including a cockpit fridge, provide ample storage for provisions. The spacious galley, available in two versions, ensures a delightful cooking experience.

The cleverly designed lockers and storage spaces ensure that all your important utensils and personal belongings have a fixed place. This keeps the interior of the Hanse 360 clear and organised so that you can concentrate fully on your sailing adventures.

A special highlight of the interior is the ambient light, which creates an inviting cosiness during the night. The warm glow of the light enhances the feeling of being on a large ship and transforms nights at sea into an atmospheric journey. This well thought-out design helps you to feel completely at ease on board the Hanse 360, even after dark.
